

BRAINLOOP ANNOUNCES FREE TRIAL OF SECURE BOARDROOM PLATFORM

Online document compliance platform streamlines, secures boardroom communications

Boston, May 20, 2010 - Brainloop, (<http://www.brainloop.com/>) the leading supplier of software solutions for high-security management of confidential documents, today announced the availability of a free trial of Brainloop Secure Boardroom. The online collaboration environment for senior executives offers a centralized document repository that ensures immediate and secure access to sensitive information. Documents can be easily collated and compiled into board books and distributed with strict access controls that ensure confidentiality and protection. The service also accelerates decision-making by enabling online voting, acting by proxy, and ad hoc meetings.

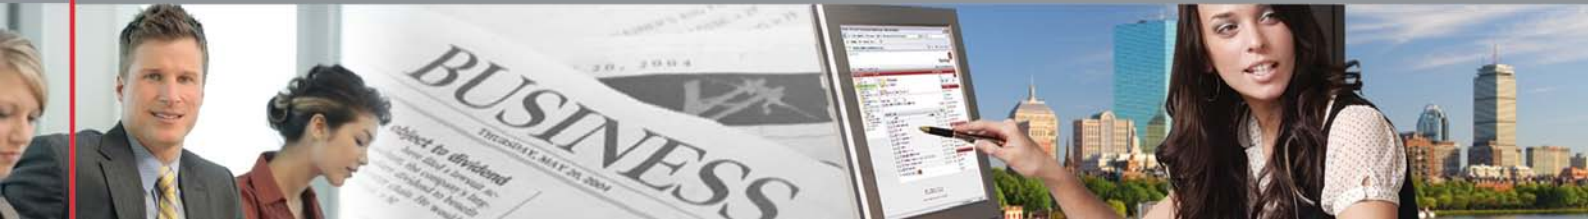

[Brainloop Secure Boardroom](#) is ideal for corporate executives who drive high-level decisions and need access to extremely confidential information without compromising security and exposing the corporation to risk. The free trial gives companies the opportunity to confirm the value of the service before purchasing.

In highly competitive global industries, executives in different locations or time zones face logistical challenges in administering boardroom activities. Yet, according to a survey by the Society of Corporate Secretaries and Governance Professionals, fewer than 35% of respondents deliver materials to Board members electronically. To meet this challenge, Brainloop Secure Boardroom provides an efficient, flexible and secure way to collaborate and direct corporate affairs while also ensuring compliance with strict corporate governance requirements. The service also offers advanced security through document encryption, shielding from access by administrators, integration with Microsoft RMS and Adobe LiveCycle, and a tamper-resistant audit trail.

BOARDROOM COMMUNICATION KEY BENEFITS

- Ensures boardroom activities remain confidential
- Simplifies document compliance management
- Enables fast decision-making through 24/7 online collaboration capabilities
- Creates full audit trails to support compliance directives

In addition to corporate executives, internal counsel and corporate secretaries also face unique challenges when trying to manage and distribute a large number of boardroom-related documents quickly, efficiently and securely. With Brainloop Secure Boardroom, counsel can easily manage approvals electronically and administrators can create, compile and deliver board documents easily while also notifying directors of changes and ad hoc updates.

ABOUT BRAINLOOP

Brainloop, with offices in Boston and Munich, is the leading supplier of software solutions for high-security management of confidential documents. Brainloop Secure Dataroom is a virtual document safe that enables safe filing, editing and distribution of highly confidential documents within a single company, and beyond. All contents are powerfully protected from unauthorized internal or external attacks, and all actions within the data room are documented by a tamper-proof audit trail. Frequent uses include contract negotiations, collecting data and writing up quarterly reports, and any other communication that contains confidential information.

Brainloop Secure Dataroom is used internationally by hundreds of renowned companies including BMW, Deutsche Telekom, Eurocopter, Galileo Industries, Sky (formerly Premiere) and ThyssenKrupp. Leading law firms and investment banks use this solution for the complete life cycle of M&A transactions. Strategic partners of Brainloop are HP, F-I-TS, Microsoft and T-Systems Business Services. <http://www.brainloop.com>
