

UNICREDIT LUXEMBOURG SELECTS BRAINLOOP SECURE DATAROOM TO PROTECT COMMUNICATION

Munich, June 2, 2010 - Brainloop, the leading provider of software solutions for the high-security management of confidential documents, announced today that the private bank UniCredit Luxembourg S.A. is using Brainloop Secure Dataroom as a management platform for sharing documents and information. The software as a service (SaaS) solution meets the bank's requirement for security and traceability when staff members share confidential documents internally as well as with external third parties.

In times of increasing data scandals and misuse of critical business information, UniCredit Luxembourg S.A. decided to use the Brainloop Secure Dataroom to share documents relating to confidential projects. Along with company staff, the group invites certain external consultants and advisors to collaborate in the data room. This enables them to protect and circulate confidential content between the various parties, independently of the bank's infrastructure, and provides secure, efficient and traceable communications.

Peter Weger, CEO of Brainloop, comments: "We're pleased to be able to count UniCredit Luxembourg S.A. among our customers. The Brainloop Secure Dataroom is the ideal platform for them to share sensitive information within the bank and with external specialists. It makes decision-making processes more efficient, which in turn benefits the bank's customers over the long term. It also fulfills key compliance regulations as it provides complete, tamper-proof logging of every access to the data room – from document creation to archiving or deletion."

The Document Compliance Management solution Brainloop Secure Dataroom protects confidential content while simultaneously recording every action undertaken during the modification, distribution, and storage of documents. The Brainloop Secure Dataroom runs on dedicated servers located in Luxembourg and in Switzerland. In this way, Brainloop is responding to the stringent national security requirements of banks, insurance companies, and other enterprises that need to ensure the best possible protection for data they share within their own country.

ABOUT BRAINLOOP

Brainloop, with offices in Boston and Munich, is the leading supplier of software solutions for high-security management of confidential documents. Brainloop Secure Dataroom is a virtual document safe that enables safe filing, editing and distribution of highly confidential documents within a single company, and beyond. All contents are powerfully protected from unauthorized internal or external attacks, and all actions within the data room are documented by a tamper-proof audit trail. Frequent uses include contract negotiations, collecting data and writing up quarterly reports, and any other communication that contains confidential information.

Brainloop Secure Dataroom is used internationally by hundreds of renowned companies including BMW, Deutsche Telekom, Eurocopter, Galileo Industries, Sky (formerly Premiere) and ThyssenKrupp. Leading law firms and investment banks use this solution for the complete life cycle of M&A transactions. Strategic partners of Brainloop are HP, F-I-TS, Microsoft and T-Systems Business Services. <http://www.brainloop.com>
