

BRAINLOOP CHOSEN BY TWITTER FOR DOCUMENT COLLABORATION

Boston, August 1, 2011 – Brainloop (www.brainloop.com), a leading supplier of software solutions for high-security collaboration on confidential documents, today announced that Twitter, the world's most popular micro-blogging site and real-time information network, has selected Brainloop's online platform for business processes.

"We are excited to be working with Brainloop," said Luca Baratta, Twitter vice president of Finance. "Brainloop's protected online workspace will be helpful as we expand Twitter's global footprint."

Since 2000, thousands of professionals from such companies as BMW, Deutsche Telekom, and Nokia, have relied on Brainloop for safe, secure collaboration.

When work calls for collaborating with people outside the company, Brainloop [protects confidential files](#) and automatically applies the necessary security policies, so workers and outside parties can focus on their tasks freely without having to worry about whether they are abiding by corporate policies.

"Most security policy applications are a big distraction," said Peter Weger, Brainloop CEO, "We make it easy for workers, partners, investors, and other stakeholders, whether they reside inside or outside the network, to do their jobs knowing they are complying with confidentiality rules, that their intellectual property is being protected, and best of all, that they don't have to worry about it."

BRAINLOOP DOCUMENT COMPLIANCE MANAGEMENT

Some of the features available in the Brainloop [document compliance management](#) application include: anywhere, anytime web-based access; document sharing with versioning, tasks, and discussions; user access controls; two-factor authentication via SMS PINs; 256-bit encryption at rest; integration with Microsoft and Adobe Rights Management to prevent unauthorized forwarding, printing and saving of documents.

Most recently, Brainloop announced it had won the "[Best Deployment Scenario Award](#)" from *Info Security Products Guide* in the Document Protection category for its work with Deutsche Postbank Group, one of Germany's largest financial services providers with €237 billion in assets.

ABOUT BRAINLOOP

Brainloop, with offices in Boston and Munich, uses document compliance management (DCM) to make online collaboration safe and compliant, giving users the peace of mind to focus on their business goals. Brainloop's web based solution automatically manages security and compliance, allowing highly confidential documents to be easily edited and distributed inside and outside the corporate network. Encryption and operator shielding protect all documents from insider threat and external attacks, providing a highly secure collaboration framework. The solution enables the complete transparency and auditability of all accesses and changes to documents, supporting corporate and regulatory compliance directives. Frequent uses include contract negotiations, collecting data and writing up quarterly reports, and any other communication that contains confidential information.
