

Brainloop and ELCA Informatik AG announce Strategic Partnership

Brainloop AG, a leading provider of infrastructure and solutions for managing confidential documents and ELCA Informatik AG, a leading Swiss company in the areas of software development, system integration and business consulting, announced their strategic partnership today. The aim of the cooperation between ELCA and Brainloop is the joint sales and distribution of Brainloop's products in Switzerland.

With more than 380 highly qualified employees and offices in Lausanne, Zurich, Geneva, and Bern, ELCA is one of the largest IT system integrators and software developers in Switzerland. The company's know-how and experience bridges the gap between business and technology. Its core competencies are in the areas of authentication, central access control, transaction and document security through electronic and visual signature.

"The partnership with ELCA is a huge benefit for us. ELCA's team understands the growing security needs and requirements of the Swiss market and fulfills them entirely," commented Oliver Gajek, CEO of Brainloop AG.

Brainloop Secure Dataroom protects important documents, financial reports and strategical projects, and allows secure document exchange and access in inter-enterprise processes. Brainloop Secure Dataroom's end to end security architecture includes encryption for storage and transmission of documents and a strong user authentication. A two factor mechanism can be used for strong authentication. Users receive a text message key sent to their mobile phone, or ELCA's own solution the "ELCARD".

"The electronic vault from Brainloop ideally enhances our IT security and document management solution portfolio. The secure management of confidential documents, including editing, distribution and storing within the company, as well as during inter-company collaboration is paramount for our clients," said Christian Hunziker, Head of Marketing & Sales of ELCA Informatik AG. "The audit trail ensures that all operations in the Dataroom adhere to modern compliance regulations and to the Corporate Governance Codex."

About Brainloop AG

Brainloop AG, headquartered in Munich, is the leading provider of infrastructure and solutions for managing confidential documents. Brainloop's customers reach important risk-management and compliance objectives by deploying Brainloop Secure Dataroom for boardroom communications, financial reporting, strategic projects and any situation where confidential documents need to be made ubiquitously available to authorized users inside and outside the firewall while being protected from unauthorized access. The Brainloop Secure Boardroom is a variation of the Brainloop Secure Dataroom, especially customized to fit the needs of the directors and the supervisory board members.

Brainloop AG

Brainloop's customers include BMW, Deutsche Telekom, T-Systems, ThyssenKrupp, Galileo Industries, Premiere, Rhön-Klinikum AG, Buchanan Capital Group and Bankgesellschaft Berlin, as well as leading legal and financial services, who use Brainloop Secure Dataroom as an ASP service.
