

HP hosts Brainloop Secure Dataroom

Brainloop and Hewlett Packard Offer an End-to-End-Solution for Secure Management of Confidential Documents

Munich, November 8, 2006 – Brainloop AG, the provider of Brainloop Secure Dataroom, and Hewlett Packard have announced a partnership to offer an end-to-end solution for protecting and exchanging confidential documents. With HP, Brainloop has won another leading service provider to host the web-based electronic safe.

HP delivers Brainloop Secure Dataroom on a highly reliable cluster infrastructure and is in charge of operations and management. Over 900 HP customers worldwide trust the virtual Dataroom to exchange confidential information, for example in strategic corporate projects or to comply with corporate governance regulations. A shared, secure repository enables Dataroom users to manage document versions and to synchronize tasks and activities of all participants.

“With Brainloop Secure Dataroom we have added a scalable and highly secure product to our portfolio. Combined with HP’s competence in security solutions we are able to deliver end-to-end information and data security,” says Stephan Winters, Global Client Director of HP Services. HP offers Secure Dataroom in an “on-demand”-model complemented with additional services, like hosting, user help desk and support, providing a highly secure cross-enterprise document repository.

“The partnership with HP enables us to offer our common customers fast and easy deployments of Brainloop Secure Dataroom. Leveraging HP’s experience as a worldwide leader in hosting critical business applications adds tremendous value.” explains Oliver Gajek, CEO of Brainloop AG.

The Brainloop Secure Dataroom's end-to-end security architecture includes encryption for storage and transmission of documents and strong user authentication. A two factor mechanism can be used for extra-strong authentication, where users receive a text message key sent to their mobile phone. Additionally, every action, like access or change of a document, is recorded automatically. A personalized watermark offers additional protection. The audit trail ensures that all operations in the Dataroom adhere to compliance regulations and to the German Corporate Governance Codex.

About Brainloop AG

Brainloop AG, headquartered in Munich, is the leading provider of infrastructure and solutions for managing confidential documents. The Brainloop Secure Dataroom is a virtual

document safe where the filing, editing and distributing of confidential documents inside and outside enterprise boundaries can be done securely. It creates a strong protection against internal and external unauthorized access, as well as an end-to-end audit trail of all accesses and changes. The Brainloop Secure Boardroom is a variation of the Brainloop Secure Dataroom, especially customized to fit the needs of the directors and the supervisory board members.

Application areas include secure filing, versioning and the distribution of confidential documents like contracts, quarterly reports, and personal or project documents.

Brainloop's customers include BMW AG, Deutsche Telekom, T-Systems, ThyssenKrupp, Galileo Industries, Rhön Klinikum AG, Buchanan Capital Group and Bankgesellschaft Berlin, as well as leading legal and financial services, who use Brainloop Secure Dataroom as an ASP service.

About HP Services

HP Services provides customers with a complete and global service. 65.000 service professionals worldwide support companies with services like consulting, out-tasking, selective and strategic outsourcing, as well as business process outsourcing. Support services, training courses and financial offers complement the portfolio. Companies gain flexibility through HP Services' expertise and can thus transform changes in the market into competitive advantages. By working closely with customers, HP Services designs service and solution concepts, that synchronize IT resources and business processes optimally. The result is a flexible and reduced cost IT infrastructure that interactively supports the reaching of company goals.

About HP

HP offers worldwide technology solutions for private, large, medium-sized and small companies as well as public contractors. The service comprises solutions for IT-infrastructure, global IT services, personal computers and access equipment, printing and image editing. In the last four quarters (01.08.2005 - 31.07.2006), HP achieved a 90 million US Dollar turnover.
