

Press Release

Initiative unites key industry leaders to bring innovative security solutions to the market

Brainloop Member of Microsoft SecureIT Alliance

Munich, 15 November 2006 – Brainloop AG, the leading provider of solutions for the secure management of confidential documents, today announced that it has joined the SecureIT Alliance, a community of security providers working together to deliver additional integrated security solutions for the Microsoft application platform. Through the alliance, Brainloop AG and security partner members will collaborate on solutions to complex security scenarios and enhancements. They are designed to protect the confidentiality and integrity of data for customers utilizing the Microsoft application platform.

The SecureIT Alliance will facilitate ongoing communication between Microsoft and Brainloop AG during the development process of Windows-based applications, facilitating increased efficiency in product integration. The alliance provides members with a public web-site and community portal of industry peers for sharing the information and best practices needed to build security solutions. Publicly available resources on the alliance web-site include security-related information, such as business case studies, technical white papers, best practice guidance, videos, presentations, and product information provided by alliance members such as Brainloop AG.

"Microsoft is pleased to have Brainloop AG join the SecureIT Alliance", said Gerry Albert, group manager at Microsoft. "Their participation will further enable well-integrated solutions with the Microsoft application platform in the area of document security".

"Our customers continue to demand end-to-end security for their confidential documents that is seamlessly integrated into their Microsoft-based IT architecture investments," says Oliver Gajek, Chief Executive Officer of Brainloop AG. "We look forward to working with Microsoft and the alliance members to deliver even more powerful security solutions."

Microsoft SecureIT Alliance

Technology is but one way that Microsoft is working to address the security challenge. The company is also working collaboratively with security partners, law enforcement and policymakers in the industry. The SecureIT Alliance is comprised of a group of security partners that are working together to develop security solutions for the Microsoft platform. The SecureIT Alliance expands the security and Internet safety partnerships Microsoft has with other industry leaders and governments, including the Virus Information Alliance and the Global Infrastructure Alliance for Internet Safety. More information on the SecureIT Alliance can be found at <http://www.secureitalliance.org> .

About Brainloop AG

Brainloop AG is the leading provider of infrastructure and solutions for managing confidential documents. Brainloop Secure Dataroom is a highly secure on-demand application for storing, sharing, and collaborating on confidential documents such as contracts, financial reports, boardroom documents, and strategic projects throughout the extended

enterprise. Brainloop Secure Dataroom makes these documents ubiquitously available to authorized users inside and outside the corporate firewall, while preventing any potential access by unauthorized users, including the IT personnel managing the Brainloop on-demand platform. Brainloop's customers reach important risk management and compliance objectives by organizing critical business processes in a secure environment where all corporate information flow can be documented. Brainloop's customers include large corporations such as Deutsche Telekom, Thyssen-Krupp, Galileo Industries and Bankgesellschaft Berlin, as well as leading legal and financial services firms.
