

Deployment of the virtual safe as an international data hub

The Eurocopter Group Implements Brainloop Secure Dataroom for International Information Exchange

München, February 14, 2007 - Brainloop Secure Dataroom, the document management system for highly secure exchange of confidential business documents, is deployed by the Eurocopter Group as a strategical enterprise platform. This company develops, sells and sponsors the world's most extensive range of helicopters. Eurocopter selected Brainloop Secure Dataroom as a central information exchange hub to guarantee the safe transfer of confidential information and to manage the flexible and efficient exchange of these documents with partners, providers and customers. The comprehensive security architecture, the ability to integrate with internal systems, and ease-of-use were key factors in the decision for Brainloop.

All users access the Dataroom through the web-based Brainloop document safe from any place in the world. In addition to commercial information, engineering documents, such as parts lists and CAD files, are stored and edited in the confidential Dataroom.

Manfred Seiler, Head of IT-Applications and R&D Projects at Eurocopter explains: "For the electronic communication between our companies, partners, and customers, we require a confidential but most of all highly flexible infrastructure, that allows all users permanent access to all company documents – independent of their location. Because of its easy use, worldwide availability, and best-in-class information security, Brainloop Secure Dataroom is the optimal solution for our our requirements. Especially in the engineering area, the large amounts of information exchange from CAD files are supported efficiently and old applications based on Odette/ISDN have been eliminated. Brainloop helps us address the global challenges facing an internationally growing enterprise in the area of helicopter and aircraft construction."

Encrypted storage is an integral component of Brainloop Secure Dataroom's end-to-end security architecture. Dataroom contents are secured with a 128-bit encryption during transmission and, additionally, with a 256-bit key while at rest. Brainloop's strong two-factor-authentication technology provides extended protection with smart cards or mobile phones. Additionally, every action, like access or change of a document, is recorded automatically. A personalized watermark offers additional protection. Brainloop Dataroom also covers future safety requirements like watermarking a document or changing it to a read-only mode.

About Brainloop AG

Brainloop AG, headquartered in Munich, is the leading provider of infrastructure and solutions for managing confidential documents. The Brianloop Secure Dataroom is a virtual document safe where the filing, editing and distributing of confidential documents inside and outside enterprise boundaries can be done securely. It creates a strong protection against internal and external unauthorized access, as well as an end-to-end audit trail of all accesses and changes. The Brainloop Secure Boardroom is a variation of the Brainloop

Secure Dataroom, especially customized to fit the needs of the directors and the supervisory board members.

Brainloop's customers include BMW AG, Deutsche Telekom, T-Systems, ThyssenKrupp, Galileo Industries, Rhön Klinikum AG, Buchanan Capital Group and Landesbank Berlin, as well as leading legal and financial services, who use Brainloop Secure Dataroom as an ASP service.

About Eurocopter

Eurocopter, founded 1992, is today a German-French-Spanish conglomerate and an EADS subsidiary, a worldwide leading company in aeronautics and space, in the defense business and its corresponding services. The Eurocopter-Group employs approximately 13,500 employees. In 2005, Eurocopter consolidated its international number one position in the helicopter sector with a 3.2 billion Euro turnover, over 401 helicopter orders and a 52% marketshare of the civilian and non-governmental market.

The sum of all conglomerate products corresponds to 30% of the worldwide supply of helicopters. Its strong global presence supports 16 subsidiaries in five continents, as well as a dense net of sales partners, authorized dealers and service providers. Currently, there are more than 9,500 Eurocopter helicopters for over 2,500 customers in 139 countries in use.
